Technical Bulletin: MAKING YOUR OWN SPLICE CLIPS

To make your own splicing clips, follow steps 1-6 on the attached drawing.

Types of Splicing Clips

This process can be completed for the following types of splicing clips:

- One-space
- Three-space
- Double loop ends

Tools Needed

To make splice clips, you will need the following tools:

- Two sets of pliers
- One set of cutters

Technical Services Support

If the guidelines fail to provide you with sufficient information, please call our technical services department at (603) 644-2500. Wire Belt Company has found no better material which balances belt life, formability, blackening, and cost than type 302 stainless steel.

A Note About Flat-Flex Belts

Flat-Flex belts are made of the finest quality, high tensile strength, highly polished type 302 stainless steel. To date, Wire Belt Company has found no better material which balances belt life, formability, blackening, and cost than type 302 stainless steel.

The belt's open construction and unique hinging design provides for the most easily cleaned open mesh available. Since 1973, the U.S. Department of Agriculture has fully accepted Flat-Flex for the use in federally inspected meat and poultry plants.
